GLASOX

B2B GLASS SUPPLY · BELGIUM

Reliable glass supply, built on experience.

Architectural and safety glass for professional customers in Flanders, Brussels and Wallonia.

PRODUCT & SERVICE OVERVIEW

Built on more than 15 years of real experience with glass.

Glasox combines hands-on experience across the whole glass process with a verified network of European manufacturers and suppliers.

Our founder went through the entire process — from manufacturing insulating glass units to leading sales as sales director, and later running his own glass installation company, from budgets and orders to installation itself.

That experience built our network of verified manufacturers, complemented by our own logistics — often including products traditional suppliers cannot provide.

Where our experience comes from.

15+

Years of experience with glass

10+

Years in glass installation and sales

Europe

Experience with international projects and customers

Belgium

Supplying products and working with Belgian partners

We are a partner, not a competitor.

We work exclusively in B2B. The result of our cooperation must be satisfaction on both sides and a successfully completed project for your client.

02 — WHY GLASOX

A better way to source glass.

Instead of managing multiple suppliers, specifications, production communication and transport separately, you work with one experienced partner.

01 — EXPERIENCE

Built on real glass experience.

Our background comes from working directly with glass and real construction projects — not simply trading products.

02 — SOURCING

A network of manufacturing partners.

Established European and international suppliers, chosen for each requirement.

03 — SUPPLY

From production to your door.

We coordinate the supply chain, logistics and delivery — one point of contact.

We supply glass from leading manufacturers.

Through our supplier network we source glass from established European and international producers, including:

AGC · SAINT-GOBAIN · GUARDIAN SUNGUARD · PILKINGTON · EUROGLAS · ŞİŞECAM FLAT GLASS

What you get

01	Competitive B2B pricing
02	Direct access to our supplier network
03	Glass according to project specifications
04	European and international sourcing
05	Logistics to Belgium
06	One point of contact
07	Long-term B2B cooperation

How we choose suppliers

We know the cost of incorrect specifications, poor packaging, inconsistent quality or unreliable delivery. That's why we never choose suppliers by price alone.

- Product quality
- Manufacturing capabilities
- Consistency
- Lead times
- Packaging
- Communication
- Logistics
- Long-term reliability

Glass for professional applications.

01	**Fully Tempered Glass** — Safety glass with increased mechanical and thermal resistance.
02	**Heat-Strengthened Glass** — Increased strength with excellent optical quality.
03	**Curved & Tempered Glass** — Custom curved glass for architectural forms.
04	**Laminated Glass** — Two or more panes bonded with a PVB or EVA interlayer.
05	**Digital Ceramic Printed Glass** — High-resolution graphics, patterns and branding.
06	**Enamelled Glass** — Permanent ceramic coating fixed during tempering.
07	**Screen Printed & Roller Coated Glass** — Patterns, dots and full coatings in RAL colours.
08	**Glass Railings & Balustrades** — Custom systems for residential and commercial projects.

PRODUCT 01 / 08

Fully Tempered Glass

Safety glass manufactured through controlled heat treatment, providing increased mechanical and thermal resistance.

THICKNESS	6, 8, 10, 12, 15, 19 mm (special: 4–5 mm)
MAX. SIZE	approx. 2800 × 5000 mm
GLASS TYPES	Clear, low-iron, tinted, reflective, low-E, frosted, acid-etched, anti-reflective, painted
PROCESSING	Cutting, edges, drilling, CNC, notches, cut-outs; optional heat-soak test
APPLICATIONS	Doors, partitions, façades, balustrades, showers, furniture, skylights

PRODUCT 02 / 08

Heat-Strengthened Glass

Thermally treated to achieve increased strength compared with untreated glass, while maintaining excellent optical quality.

THICKNESS	4, 5, 6, 8, 10, 12, 15, 19 mm
MAX. SIZE	approx. 2800 × 5000 mm
APPLICATIONS	Façades, curtain walls, large architectural glazing, structural glazing, interior architecture

PRODUCT 03 / 08

Curved & Tempered Glass

Custom curved and tempered glass for architectural forms and design features.

MAX. SIZE	approx. 2850 × 2200 mm
MIN. RADIUS	6 mm: R900 · 8–10 mm: R1200 · 12–15 mm: R1500
OPTIONS	Laminated curved glass, decorative sandblasting, custom shapes
APPLICATIONS	Curved façades, doors, balustrades, skylights, solariums, interior walls, furniture

PRODUCT 04 / 08

Laminated Glass

Two or more glass panes bonded together with an interlayer such as PVB. If the glass breaks, the fragments stay in place.

PANE THICKNESS	4, 5, 6, 8, 10, 12, 15 mm
PVB INTERLAYER	0.38, 0.76, 1.14, 1.52 mm
MAX. SIZE	approx. 2800 × 5500 mm
INTERLAYERS	Clear, coloured, opaque, acoustic, security, extra-stiff, EVA
APPLICATIONS	Balustrades, stairs, façades, skylights, partitions, doors, floors, security and acoustic glazing

PRODUCT 05 / 08

Digital Ceramic Printed Glass

High-resolution ceramic printing for architectural graphics, patterns, images, branding, privacy and decoration.

THICKNESS	4, 5, 6, 8, 10, 12, 15, 19 mm
MAX. PRINT SIZE	approx. 2400 × 5000 mm
PRINTING	Full or partial, interior or exterior surface, patterns, photographic graphics, custom designs
COLOURS	RAL, Pantone, NCS, custom
COMBINABLE	Tempered, laminated, curved, double-glazed

PRODUCT 06 / 08

Enamelled Glass

Architectural glass with a permanent ceramic coating, fixed during the tempering process.

THICKNESS	4, 5, 6, 8, 10, 12, 15 mm
MAX. SIZE	approx. 2600 × 5000 mm
OPTIONS	Full or partial coating, custom colours, different opacity levels
APPLICATIONS	Wall cladding, façades, interior walls, partitions, furniture, kitchens

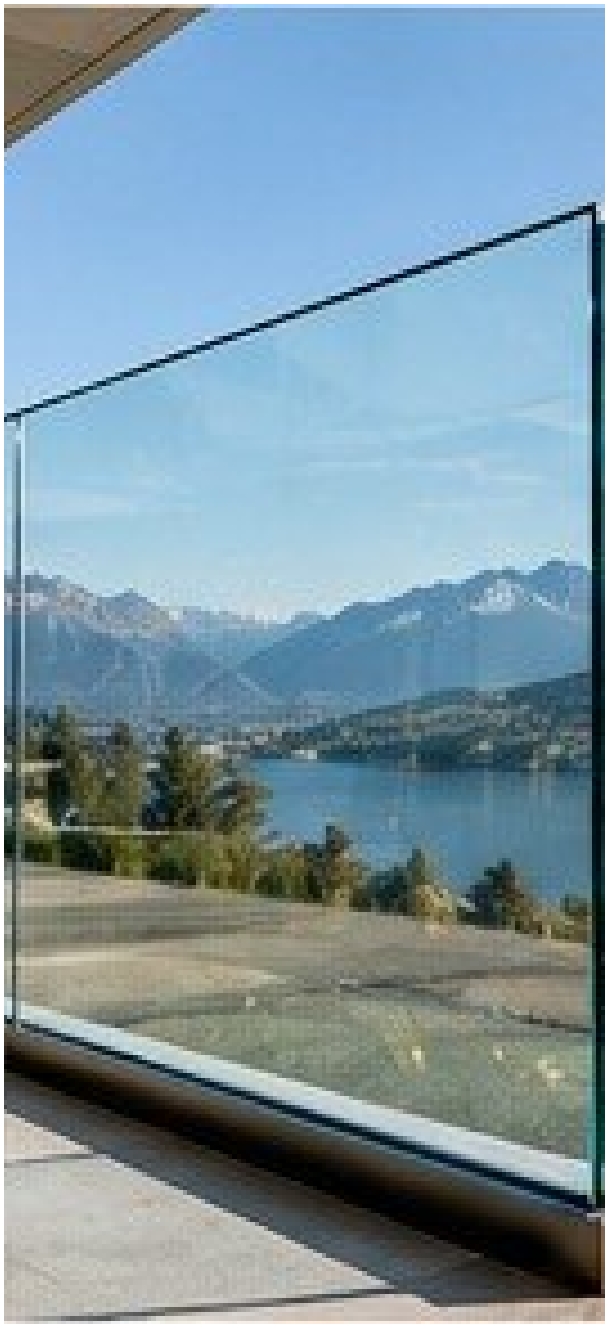

PRODUCT 07 / 08

Screen Printed & Roller Coated Glass

Silk screen printing, roller coating, digital and manual printing for functional and decorative glass.

OPTIONS	One or two print layers, full or partial coating, patterns, dot patterns, solar-control patterns
COLOURS	RAL and project-specific references
APPLICATIONS	Office partitions, façades, skylights, furniture, showcases, lighting, white goods, doors, wall coverings

PRODUCT 08 / 08

Glass Railings & Balustrades

Custom glass railing and balustrade solutions for residential, commercial and architectural projects.

SYSTEMS	Frameless, framed, base channel, point-fixed, hidden fixing; stainless steel or aluminium; optional handrails
GLASS	Tempered, laminated, curved, printed, coloured, patterned, smoked, bronze, reflective
APPLICATIONS	Staircases, balconies, terraces, pool areas, decks, interior railings

04 — PROCESSING

Processed to your specification.

Glass supplied with project-specific dimensions and processing requirements.

- Cut to size
- Edge processing
- Drilling & CNC
- Tempering
- Heat-strengthening
- Lamination
- Digital ceramic printing
- Enamelling
- Screen printing
- Roller coating
- Curving

04 — YOUR SPECIFICATION

Send us what you have.

Complete specification or just a project description — we help you finalise the details before we quote.

We work with

01	Dimensions and glass build-up
02	Drawings and CAD files
03	Architectural specifications and BOQs
04	Project documentation and samples
05	Performance requirements

A complete enquiry includes

01	Glass type and thickness
02	Dimensions and quantities
03	Edge work and processing
04	Drawings or specifications
05	Delivery address and date

05 — HOW IT WORKS

From your requirement to delivery.

01 **Requirement**
You send dimensions, specifications, drawings or a description of the project. We help finalise the specification if needed.

02 **Sourcing**
We identify suitable products and manufacturing partners from our European and international supplier network.

03 **Quotation**
You receive a clear B2B quotation covering product specifications, processing and delivery scope.

04 **Production**
We coordinate manufacturing, communicate your specifications to suppliers and arrange protective packaging.

05 **Delivery**
We organise transport and deliver to your company or agreed destination in Belgium.

One partner coordinating sourcing, production and logistics.

A supply partner, not just a supplier.

Slovakia
Sourcing · Central Europe

Belgium
Flanders · Brussels · Wallonia

Built around your purchasing needs

01	Recurring orders
02	Project-based orders
03	Agreed product specifications

—	Purchasing volumes
—	Delivery frequency
—	Destination and logistics

06 — B2B SUPPLY

Built for professionals.

01 **Glass companies**
Regular glass purchasing and processing.

02 **Manufacturers**
Doors, partitions, balustrades, furniture and architectural products.

03 **Installers**
Reliable supply to installation projects.

04 **Construction companies**
Residential, commercial and renovation projects.

05 **Interior professionals**
Architects, interior companies and specialist contractors.

For regular customers we develop individual purchasing and logistics solutions based on volumes, specifications and delivery requirements.

GLASOX

LET'S WORK TOGETHER

Let's talk about your glass requirements.

Tell us what you currently buy, how much you use and where you need delivery. We will review your requirements and prepare a B2B offer.
